[www.onthisday.com/events/date/2017](http://www.onthisday.com/events/date/2017)

A wide-angle photograph of a modern brick building with large glass windows and a curved facade. The building appears to be a school or educational institution. In the foreground, there is a paved area and some greenery. The text "NEW AND EXCITING THINGS ARE HAPPENING AT GPA!" is overlaid at the bottom of the image.

## **NEW AND EXCITING THINGS ARE HAPPENING AT GPA!**

I really enjoyed GPA this year!

There were many NEW (and “new” old) things. For starters, I was happy to welcome Dr. Gonzalez back as school Principal if even for a short time. The school really blossomed under his leadership and we’re sorry to see him go - but wish him well in his life back in the United States.

Secondly, we met a number of new students (10), new teachers (12), and new administrative staff (3). I also was privileged to be able to teach a number of new classes (5) including: Middle School Technology, Digital Citizenship (Middle School), Robotics, Graphic Design / Branding, and AP Computer Science Principles. You can read more about our experiences with some of these new Technology classes (including Yearbook) a little later in these pages.

I know Mr. Lapointe also did an exciting new thing in Science - a pig dissection! We were also able to purchase 6 new Google Chromebooks to assist teachers and students with classwork. And many people have argued that the Spring Recital was one of the best recitals we’ve ever had at GPA. But even though we had some rough transitions in the middle of both of our semesters, I feel like the students and staff handled everything quite well.

In sports, we were quite competitive this year with both the Boys Futsal team and the Girls Basketball team taking 5th place among the SKAC schools. And our students did very well in the SKAC Science Fair with four of our teams placing 1st or 2nd in their various areas. (Also, hats off to their teachers who helped guide them to this level of success.)

Finally, we had a very large graduating class of 10! Here’s to next year! Let’s make it a good one!

Have a Great Summer Vacation!

## **CLASS OF 2017**

---

My favorite memory in 2016-2017 was Spring field trip, the paint ball and ATV activity was best part of field trip. Also the barbecue in hotel was pretty good, good quality of pork with hot rice is best food in the world. Even the hotel was so good, I'm sure that it was best field trip hotel in our entire school history. And especially this field trip was my last field trip in high school so i try to spend my time usefully and I think I achieve my desire.

## **CLASS OF 2018**

---

My favorite memory the 2016-17 school year is a Field trip in 2017 spring semester. I enjoyed this the most because this time we had more exciting activities like paintball and ATV. Especially ATV was so fun! Also, the food was delicious and the residence's landscape was good so we could play around and took some pictures. I hope that next field trip can be fun as same as this time :)

## **CLASS OF 2021-22**

---

It was the Halloween day, it was nice that many people dressed like zombies, mummies, wizards, unicorns, etc . Since it was Halloween, we got candies! Also the 2nd trip that we took was to Muju, because we did a lot of fun things there. Then best part was at our rooms and the pork steak (삼겹살) party

The Design class rebranded a product or brand of their choice. They learned about layout & composition, color theory, typography, branding, marketing, and product design.

Students completed:

1. a 6-brand Competitive Analysis
2. a SWOT Analysis
3. a Unique Selling Proposition
4. moodboards
5. a brand color palette & fonts
6. created new taglines
7. sketched 100 new logo ideas
8. digitally recreating the best 3
9. put the logo on merchandise
10. created a FULL (40-50 page) book that included ALL the work from the semester.

I chose to brand Steam because I had interest in that company before and I know that this company is very interesting. Steam is a game store company but it also has many interesting functions like chatting rooms, a friend system, and game making. In addition, they have sale events a lot so gamers can get the chance to buy games at a cheap price. I wanted to show this company to more people, but this company does not have many advertisements and has boring contents, logo, and designs so I decided to rebrand Steam.

I learned that rebranding a company is more complicated than I thought. When you need to rebrand something, you need to search the company's background; what they do, what they sell, who uses that company, and which companies are competing with this company. Also you need to do LOTS of brainstorming to make new logo designs because when we express our many ideas, we can qualify a better logo.

**STERM REBRAND**

by Kyulim Lim

In the first half of the Fall semester, Mr. White asked our Design class to create Pennant

designs for all the teachers at GPA. The motivation was to be able to show students a

large variety of college choices and majors that the students could ask about.

As you can see, there's quite a variety of schools and majors represented here.

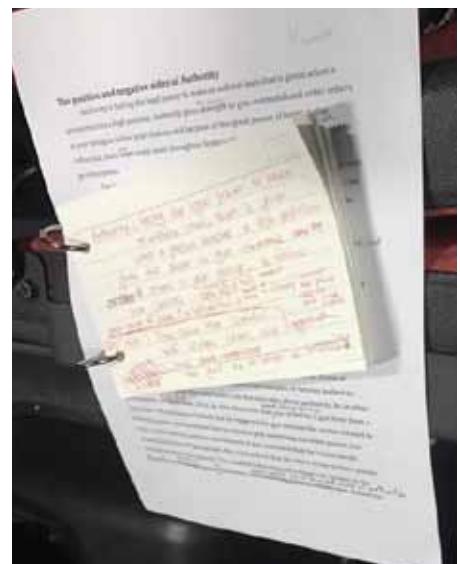

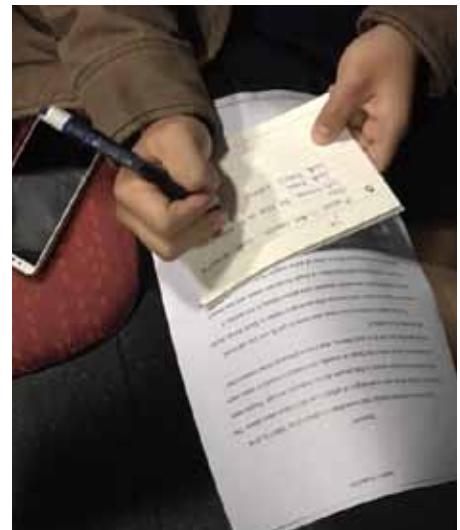

Each student was assigned 3-4 pennant designs for one or more teachers.

The Design class also created our new eagle head logo that we've put on the website & sports jerseys.

# Classical Lit Projects

# History

MR. VANCE

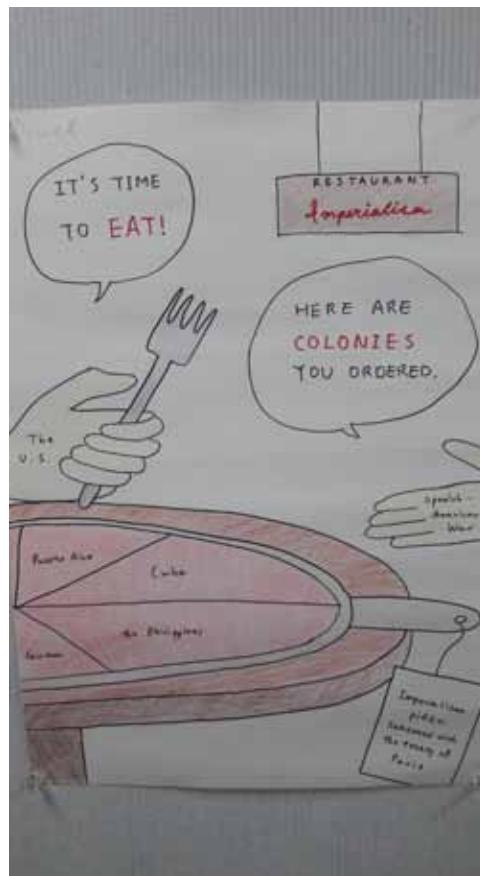

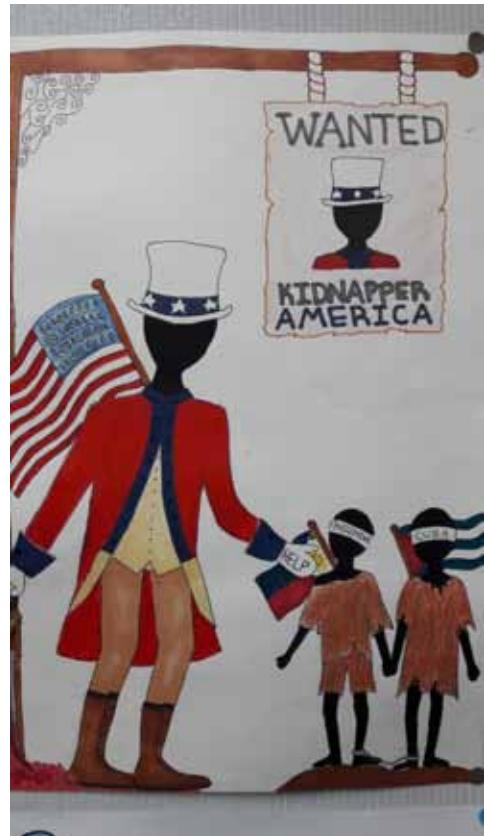

The first image (above) are metaphors for imperialism that the U.S. History B class made and I thought were funny.

About the Political Cartoons that follow:

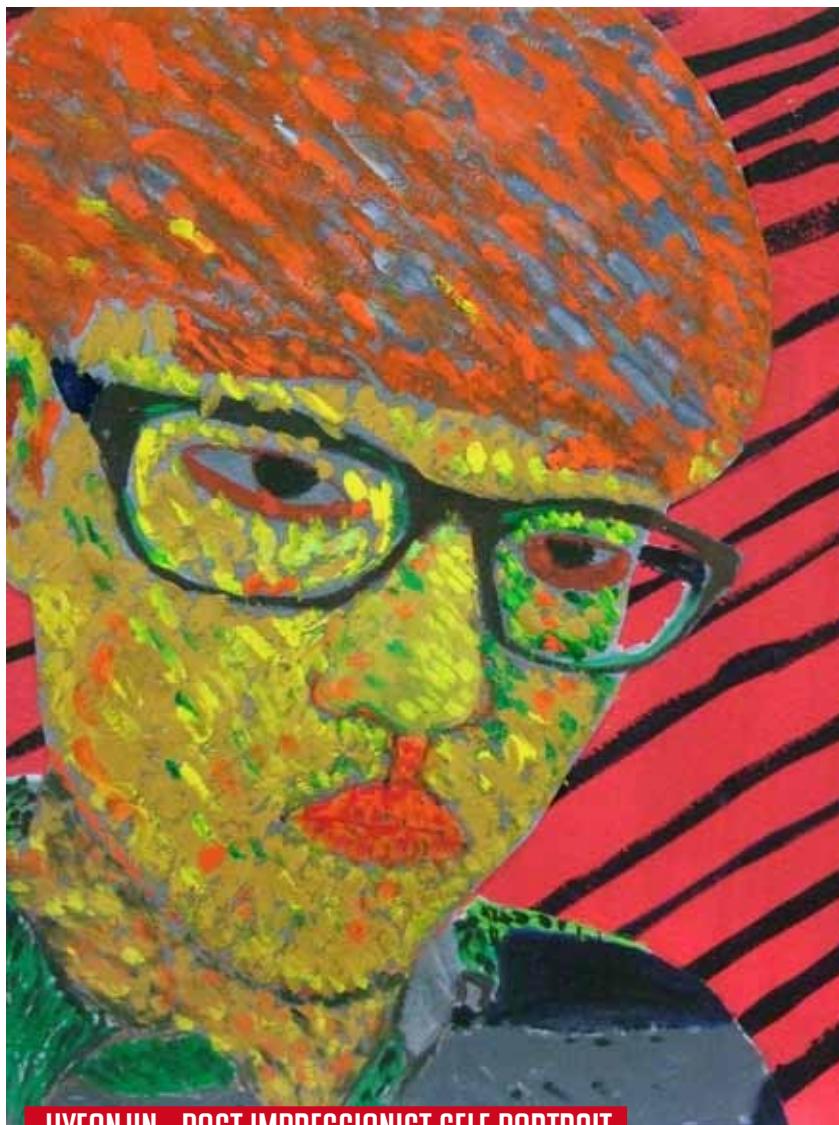

In our U.S. History B unit, **The Emergence of Modern America**, students were asked to create Political Cartoons that reflected their understandings of The Spanish-American War.

Students chose a real 1898 magazine that they “worked for” and tried to convey a pro-imperialist or anti-imperialist message. Here are a few of the class favorites.

# Art

HYEONJIN - POST IMPRESSIONIST SELF PORTRAIT

JIWOO LEE - CHALK CARVING

JIWOO LEE - "FIGURE SKATER COOKIE"

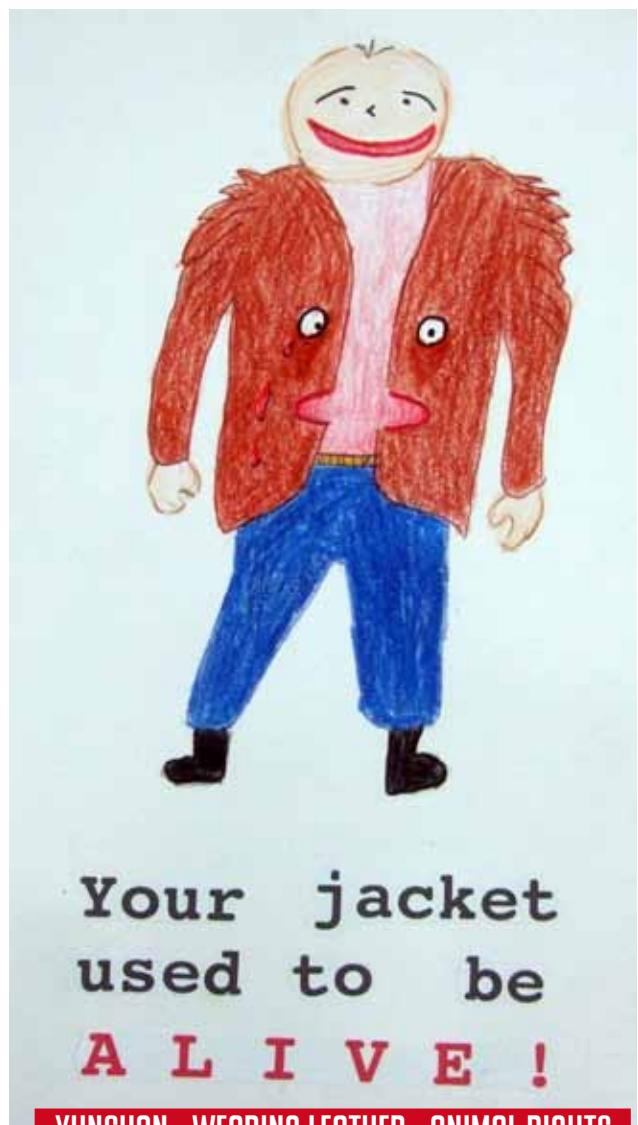

JEAHYUK JEONG - MIXED MEDIA - BROCCOLI CREATURE

MARINA & JINWOO - PRAIRIE STYLE LIGHT - SCREEN DESIGN

AMY LEE - "SPIRAL OF LIFE" INSTALLATION ART

YUNCHAN - WEARING LEATHER - ANIMAL RIGHTS

# Art

RICHARD KIM - WATERCOLOR PAINTING

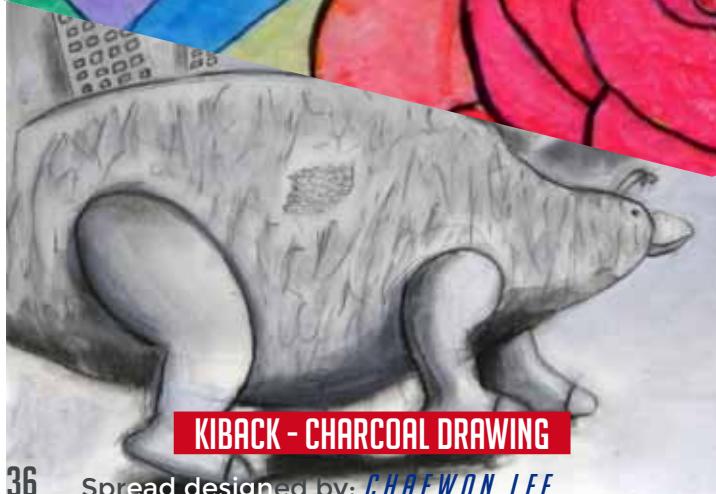

CHANHWI - WATERCOLOR FLOWERS

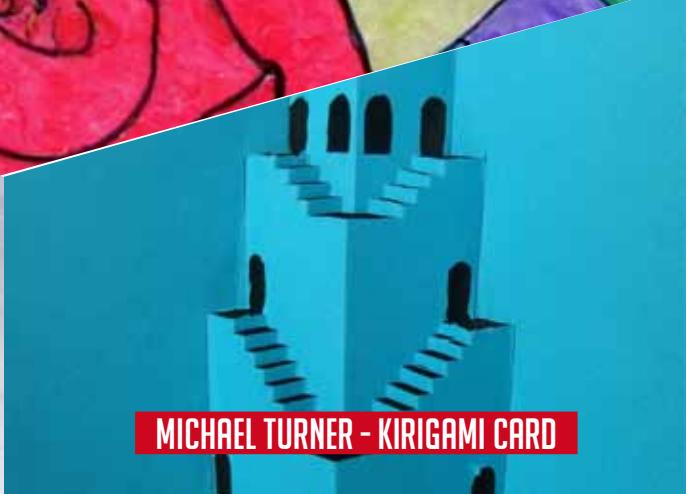

SEAH KIM - FANTASY MIXED MEDIA DRAWING

KIBACK - CHARCOAL DRAWING

MICHAEL TURNER - KIRIGAMI CARD

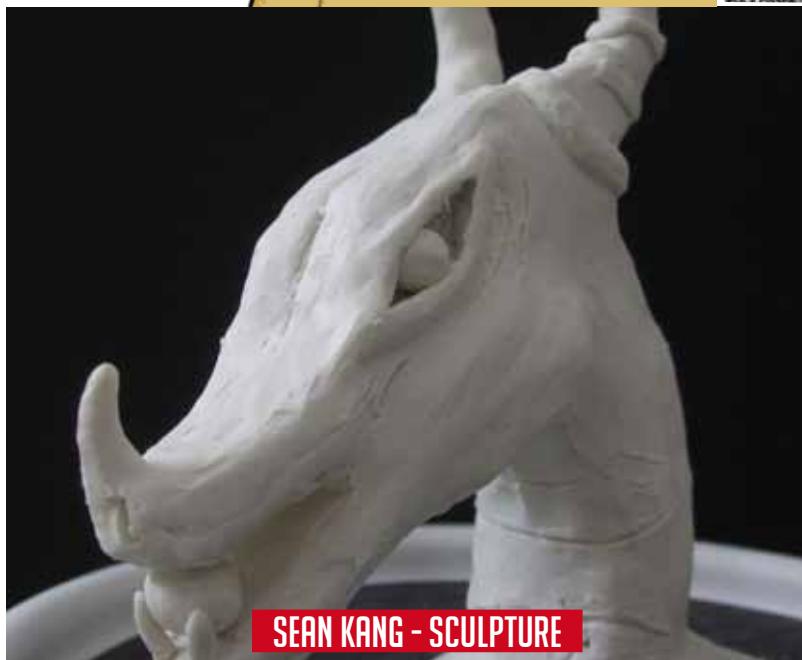

CHAEERIN KIM

MINA JEONG - DIGITAL LINE DRAWING

SEAN KANG - SCULPTURE

YUJIN KIM - NEWSPAPER & TAPE SCULPTURE

# Science

**MR. LAPONTE**

In Mr. Lapointe's class, students were given the opportunity to dissect a baby pig. This activity took place over the course of a few days with the abdomen dissection happening first, followed by dissection of the chest cavity. Aside from complaints of bad smells, the students seem to have learned a lot and had some fun exploring the pig's innards.

# Science Fair Prep

**MS. TURNER**

The students have worked so hard and been pushing themselves to get this done, even to the point where about 30% of our student body was at work in the Art/Sci building until 11pm the night before the science fair, adding details to their posters and decorating them. It's so rewarding for them to have the support of all their teachers.

# AP CS Principles

TOTAL Levels completed: 5,891

Most completed levels: 669 (Sung Woo Choi)

TOTAL lines of code written: 38,996

Most lines of code written: 5,078 (Amy Lee)

## PERFORMANCE TASK: EXPLORE

### GPS

by Jihyun Lee

The Global Positioning System primarily relies on low-power radio signals between satellites and receivers to determine users' 3-D geolocation. The GPS radio signal is typically made up of three kinds of data: the pseudorandom code to determine which satellite is sending the signal, the almanac data that tells the receiver of the satellites' orbital data, and the ephemeris data which contains information about a specific satellite's state. When a GPS receiver receives the transmitted signals, it calculates the distance from each satellite using the time it took to receive the signal. After that, the device uses triangulation to calculate its exact location.

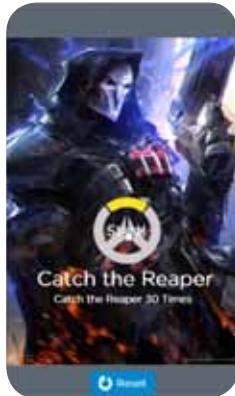

### YOUTUBE

Jiwoo Lee

YouTube collects videos uploaded by people all around the world. When we upload videos to YouTube, the devices we use to send the videos packages the video into IP packets. The packets are then encoded as radio signals and sent out over the cellular network airwaves. The base station at the cell tower receives the radio signals and converts them to wired bits. YouTube receives the wired bits and reassembles or converts the packets and the video format.

## PERFORMANCE TASK: CREATE

### OVERWATCH CLICKER GAME

by Sung Woo Choi

#### THE PROGRAM'S PURPOSE

Using JavaScript, I developed a Clicker Game. The objective is to click on the hooded figure. Clicking on him once grants one point; victory is achieved by collecting thirty points. At fifteen points, the same hooded figure, but blue, appears. Each click on him takes away one point. At twenty points, a hero figure appears. Clicking either this hero figure or the background decreases lives by one. When life points reach zero, the game is over.

#### DEVELOPMENT OF THE PROGRAM

I developed this program alone. I decided to have the game be difficult and easy to understand and play at the same time. I also did not want the game to be too long or too short when it came to gameplay time. So I set the score to a reasonable amount of thirty points and chose three main anomalies (mentioned above) against the main objective. Each anomaly has its own or sharing a negative feedback for the player to experience.

### A FIREFLY AND STARLIT SKY

by Doohyeon Won

#### THE PROGRAM'S PURPOSE

"A Firefly and Starlit Sky" is a mini game which is developed using ActionScript 3.0. The purpose of the game is to avoid the moths by moving the mouse on the game screen. The moth flies from right to left and the user can move the mouse freely to avoid the flying moth. Also, if the moth passes through

the left side, the moth disappears and the score increases. If the score increases to some degree, all the moths disappear and the game becomes a little more difficult (by adding another moth). Finally, if the firefly collides with one of the moths, then the game is over and the program shows the final score.

# Yearbook

MR. SNOWBERGER  
TEMPLATES

This is the second year that “Yearbook” has been an official class at GPA. Before this, Yearbook was an After-school Activity and was led by one of GPA’s full-time teachers. This year, the students learned some of the basic principles of Graphic Design - particularly Layout and Composition, the basics of Adobe InDesign, and some Photoshop.

Each student was also responsible for writing three newsletter articles which they uploaded to the GPA English website, and then designing their own newsletter with their three articles. I provided them all with basic instructions for newsletter design as well as some template parts, but each student put together the newsletter on their own.

After the completion of the newsletter, the class each designed 5-6 pages for the Yearbook. We used the same basic template we used last year with some slight modifications. To see the complete Newsletter and Yearbook designs, visit:

[HTTP://GPA.JUSTKEEPLEARNING.XYZ/YEARBOOK](http://GPA.JUSTKEEPLEARNING.XYZ/YEARBOOK)

## MY EXPERIENCE IN YEARBOOK

BY CHAEHEE HAN

In Yearbook class, we learned how to use different skills that are needed for making an article or changing an image. We used Canva to learn the computer skills throughout quizzes and tutorials. For changing images, we used Photoshop.

The first step of making a Yearbook was to find Yearbook covers from other schools that are interesting. We voted for the best Yearbook cover design and we started modifying the cover so that we don’t use the same cover as the other schools. Our best Yearbook cover design was the eagle design. To modify the eagle cover, we looked for a similar eagle image and by using Photoshop, we changed the eagle to more mosaic way.

We also created articles for a Newsletter. The students wrote things like teachers’ interviews, classes, events, and other things that students are interested in. So far, we have interviews with Mr. Joselson, Mr. Begdouri, and Ms. Bowles. For classes, there are articles about Music class, Beginning Sculpture Class, Ancient Civilization B, Art class and Biology. For articles about events and things that students are very interested in are Children’s Day, Novelty Cafes, the Field Trip, and so on.

For the last step, our teacher, Mr. Snowberger, made a template for the Newsletter and Yearbook and the students put in their articles and the photos on their own. My articles are “Gone Girl Book Review”, “In Music Class”, and “About Jeonju”. So far, I really like the Yearbook class and I’m enjoying making the Yearbook.

# ACTIVITIES

---

# STUDENT COUNCIL

*shares their favorite memories from the school year*

My favorite memory during this semester was sports day. Sports day was conducted by Andrew and me, and we planned sports day to make a new experience to the students. Since our school is small, it did not have a lot of events and amusing activities. So, we decided to have sports that everyone can participate. For me, it was really interesting activities and I was happy that everyone participate to our activities. I hope everyone have a great experience through this event.

**STUDENT COUNCIL PRESIDENT**

DAEWOOK LIM

My favorite memory from the 2016-17 school year is 2017 field trip. Riding a motorcycle is the best activity among the activities we did. By riding it at high speed, we could release our stress and observe beautiful landscape along the way. Since the resort was surrounded by the mountain, there were lots of photo zones. Also, the room was spacious and clean, so we conveniently stayed over night.

**STUDENT COUNCIL VICE PRESIDENT**

YOUNA KIM

My favorite memory in 2016-2017 was Spring field trip, the paint ball and MTV activity was best part of field trip. Also the barbecue in hotel was pretty good, good quality of pork with hot rice is best food in the world. Even the hotel was so good, I'm sure that it was best field trip hotel in our entire school history. And especially this field trip was my last field trip in high school so i try to spend my time usefully and I think I achieve my desire.

**12TH GRADE STUDENT COUNCIL REPRESENTATIVE**

KILIM CHOI

My favorite memory the 2016-17 school year is a Field trip in 2017 spring semester. I enjoyed this the most because this time we had more exciting activities like paintball and ATV. Especially ATV was so fun! Also, the food was delicious and the residence's landscape was good so we could play around and took some pictures. I hope that next field trip can be fun as same as this time :)

**11TH GRADE STUDENT COUNCIL REPRESENTATIVE****KYULIM LEE**

The favorite memories during 2016~2017 school time was the field trip. All of the student in school gather together and played together, it was fun time to enjoy playing games and have food with friends, also the overnight was awesome.

**10TH GRADE STUDENT COUNCIL REPRESENTATIVE****TAESOP AHN**

My favorite memory from the 2016~17 school year is the field trip we had in 2017 spring semester. It was the first time in my life getting to drive an ATV and it was very exciting. I was very happy that I got to make good memories with my friends during the trip.

**9TH GRADE STUDENT COUNCIL REPRESENTATIVE****KUNWOO LEEM**

It was the Halloween day, it was nice that many people dressed like zombies, mummies, wizards, unicorns, etc . Since it was Halloween, we got candies! Also the 2nd trip that we took was to Muju, because we did a lot of fun things there. Then best part was at our rooms and the pork steak (삼겹살) party

**MIDDLE SCHOOL STUDENT COUNCIL REPRESENTATIVE****JINWOO CHO**

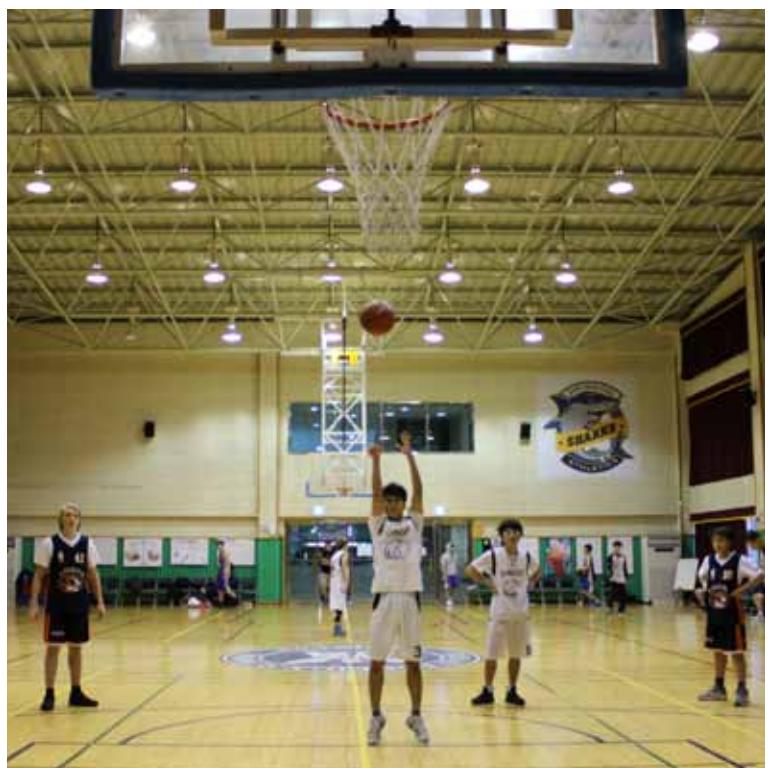

# BOYS BASKETBALL

Jeonju's finest, the Golden Eagles, will take over the courts again this spring. We'll continue to work on the fundamentals of ballin' hard, pounding the paint, and jacking up ill-advised trey balls. This activity is mostly about teamwork, friendship building, respect, exercise, and having a grand ole time. If you ball hard enough, who knows, you might even grow a few centimeters. I'm pretty sure that you could use some fresh air too.

**MR. VANCE**

# GIRLS BASKETBALL

In Girl's Basketball we will not only play basketball and learn about the fundamentals of basketball, but we will also begin a conditioning program. We will work on aerobic conditioning and flexibility during the first two weeks with the goal of creating a program that you can follow in order to improve your fitness. One of our goals is to improve our team in preparation for the season next fall. Of course we want to have fun and enjoy playing basketball, but we also want to build on our success this year and improve our team.

MR. DEAN

# CROSS COUNTRY

Hello GPA students! Do you like running? Do you like to compete but don't like team sports? Well then, have I got the activity for you. Join the cross country team and start running. It's great exercise and an important survival skill. If society collapses and the animals (or zombies) inherit the earth, you will be glad you joined. Students who sign up must compete in a competitive cross country meet with other schools.

MR. FULLER

# FUTSAL

Futsal is a very fast paced game. Though it has smaller area to navigate than football, it focuses more on creative movement and players have to be more agile and aware of their surroundings on and off the ball. This sport will improve your stamina, and coordination skills. Each team are allowed 5 players, and can sub as often as they wish too. This activity will include warm-ups, drills, and of course, tournaments. Students should have trainers or astro boots (not cleats), shin pads, shorts or running trousers, and a t-shirt or/and sweater/hoodie.

MR. JOSELSON

Mr. Schottler will be coaching girls futsal this semester. This is a smaller version of soccer. Also, it includes official competitions, so we will be playing in tournaments against other schools. The main goal for the season will be to have fun with your friends.

MR. SCHOTTLER

# Futsal Gallery

# HORTICULTURE

Mr. Fuller will be in charge of this two-part activity. At first we will be getting together to watch some great films. Once the weather starts to warm up, we will be heading outside to create a vegetable, fruit and herb garden next to the GPA parking lot. Students will feel a sense of pride as they watch their hard work grow into delicious fruits and vegetables.  
Join now!!!

MR. FULLER

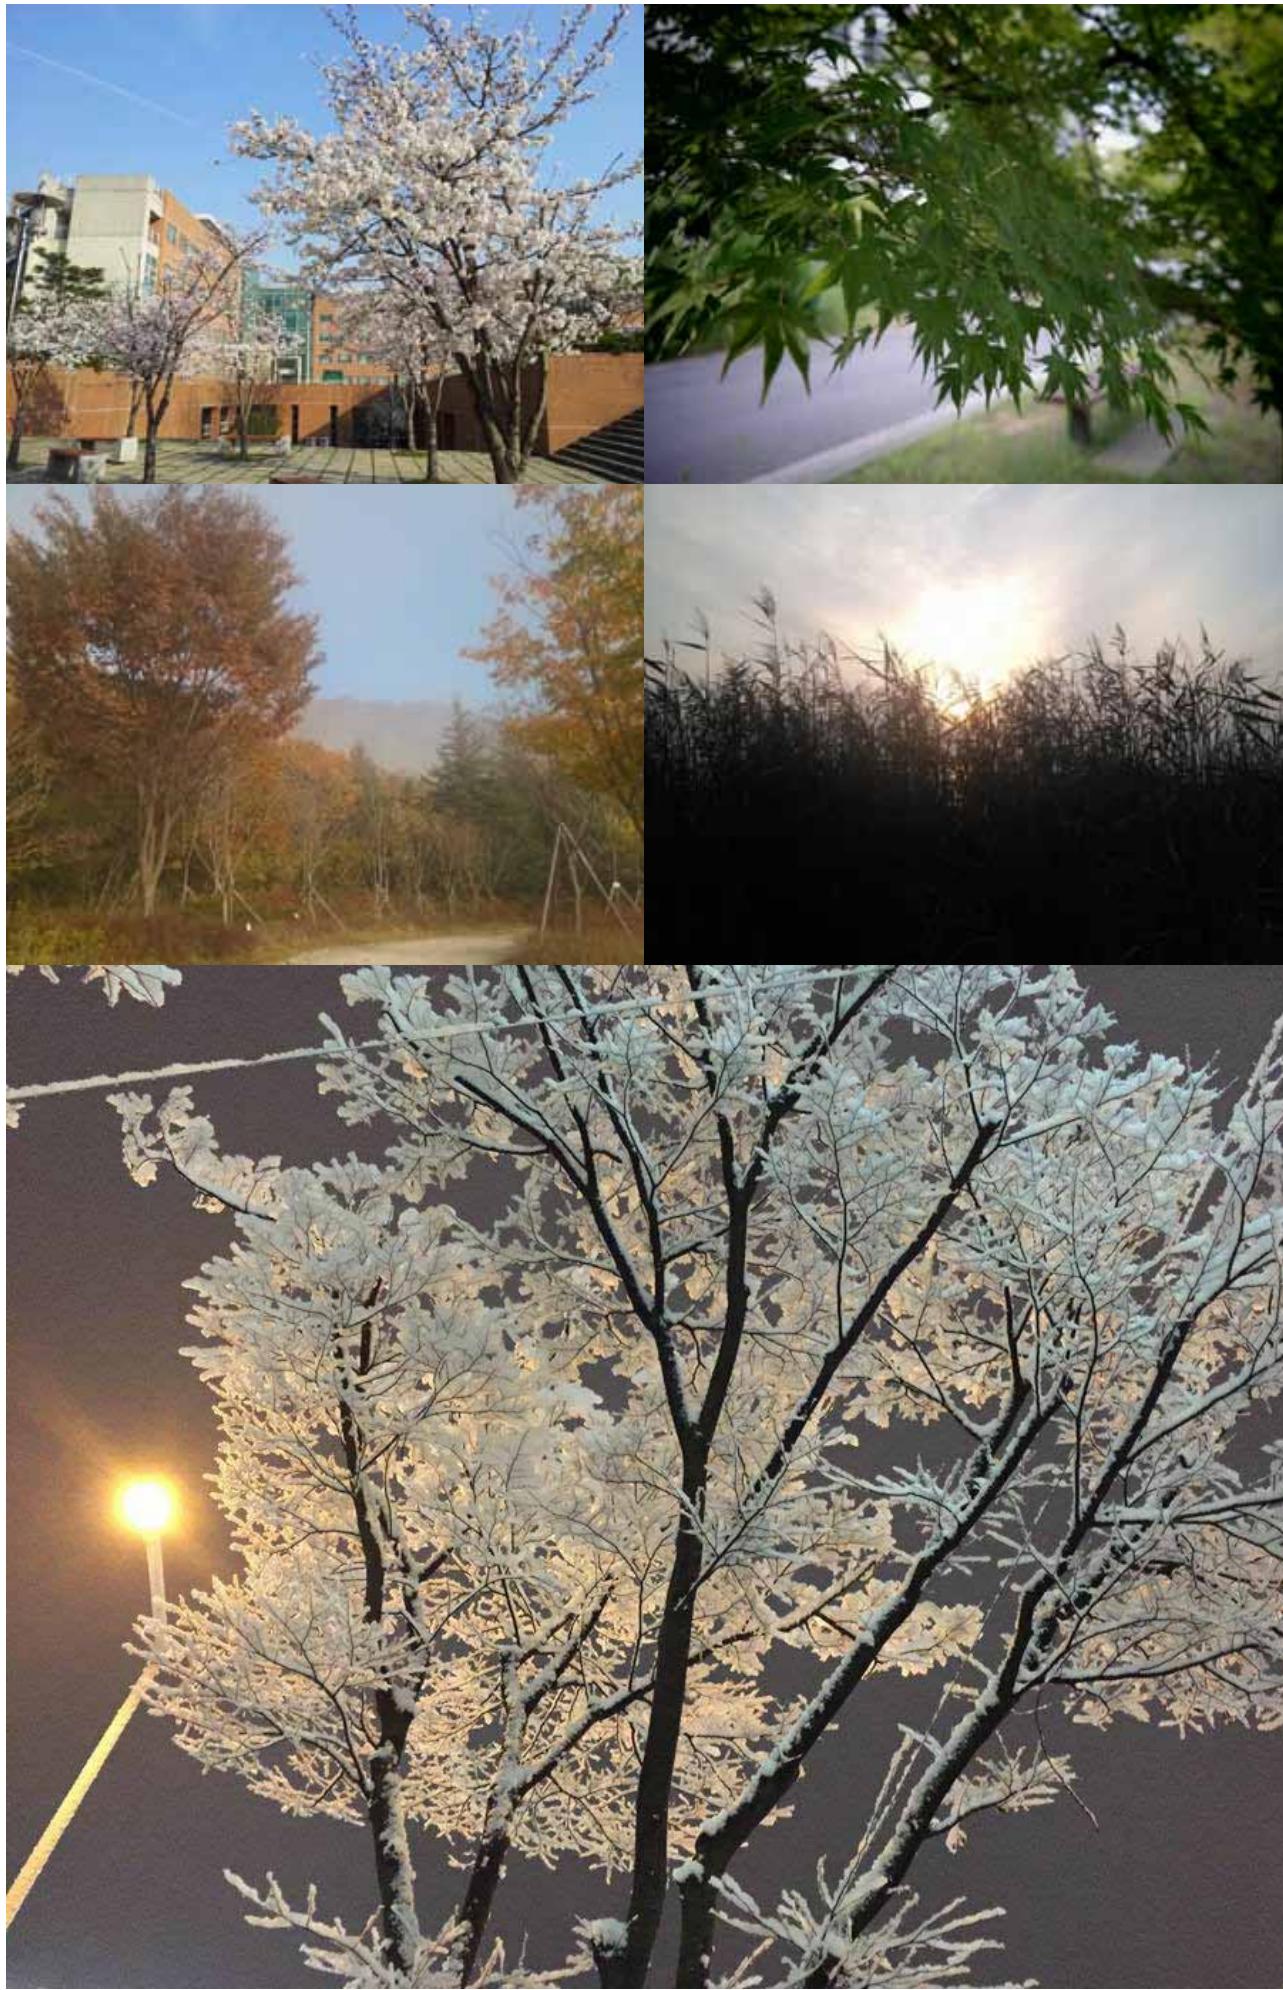

# PHOTOGRAPHY CLUB

This activity will focus on the practice and practical use of photography. Many students enjoy taking pictures and editing them for friends and fun but besides being a career, photography is a useful tool in documenting activities and events. Students will define a project and use their skills in photography to prepare a presentation or portfolio based on the approved project they have chosen.

MS. DERMENDJI

# Photography Gallery

# SERVICE LEARNING SPORTS DAYS

Students from **Service Learning** (Andrew Choi and Daewook Lim) organized a series of sports events for the whole school to participate in. The goal of Sports Day was to provide a fun activity at the end of the semester for students to get a break from studying and working and to help all students make new friends in different grades. All GPA students were divided into 4 teams and competed in dodgeball, kickball, and a relay race. Andrew and Daewook organized the whole thing and generously provided drinks for everyone on sports day. The winners were **Team Red**, who enjoyed a delicious chicken dinner as a reward.

MS. TURNER

# ADDITIONAL ACTIVITIES

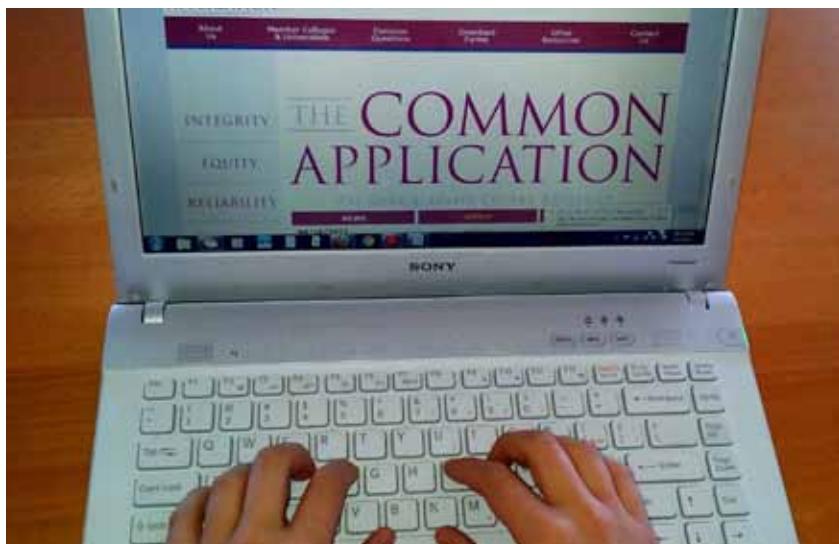

The **ESL Book Club** was organized by Sungwoo Choi and Tommy Lee. Sungwoo and Tommy were the leaders of the group and helped Soonhyun, Ji-hyuk, Jiwoong, Hyunwoo, Mingyu, and Taeyoung read **Flowers for Algernon** over the semester. Sungwoo and Tommy helped with new vocabulary, pronunciation, and practice reading out loud. The students were responsible for writing summaries of each chapter that they read. On the last day, Sungwoo and Tommy bought snacks for everyone to celebrate their success.

Jenny Lee and Susan Kim managed the **Sweet Summer Juice Bar** in the second-floor conference room this semester. Every Tuesday and Thursday, the girls served delicious juice and iced coffee to thirsty students who needed a sugar rush before heading to their activity. Jenny and Susan made posters, created a menu, shopped for ingredients, and managed their own staff. Their goal was to donate the money they made to charity.

MS. TURNER

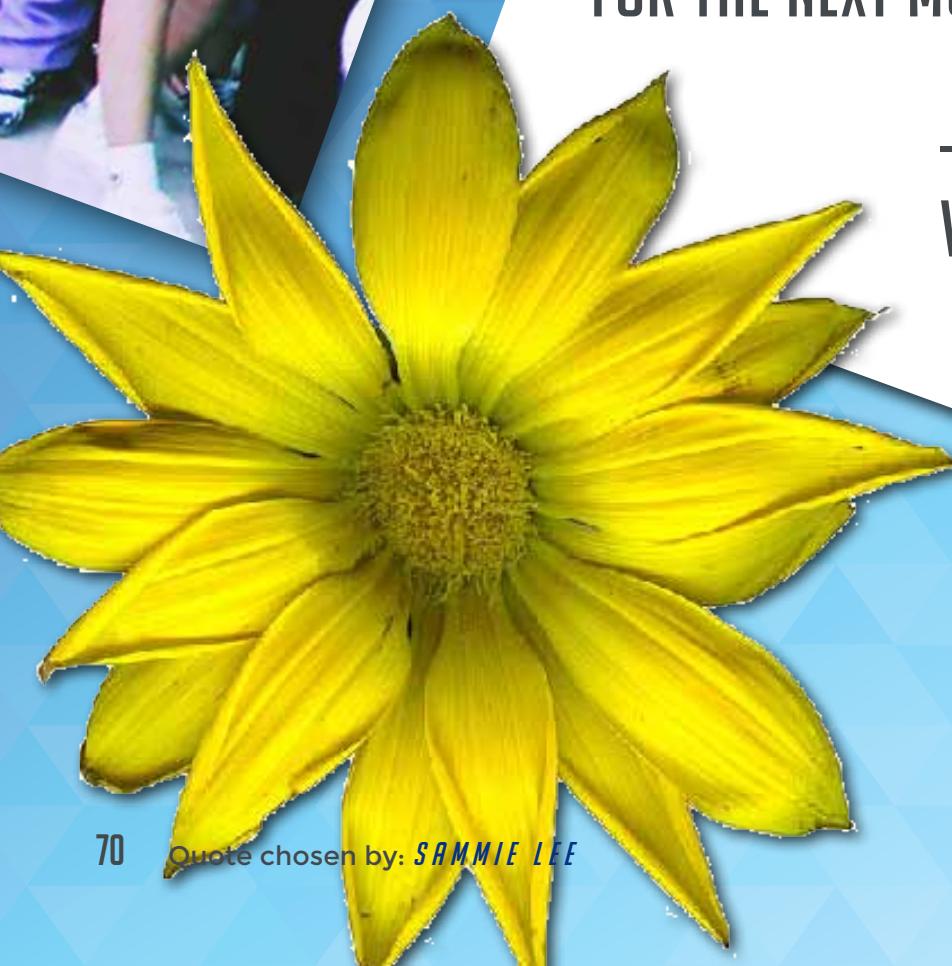

Sinae Park was in charge of the first student-lead activity this semester. Sinae wanted to share her experience with applying for college using the **Common App**, studying for standardized tests like the SAT, ACT, and TOEFL, and choosing a college. Sinae helped Chanhwi, Chaehlee, Boosung, Seula, Jaegwang, Kiback, and Andrew get a head-start on their college application and shared valuable information from her experience with successfully applying to college in the United States.

DOING
